

Technical Skills

Programming Languages: Java, JavaScript, C++

Frameworks: React JS, Redux, Context API, Spring Boot, Bootstrap, MUI

Tools: Eclipse, MySQL Workbench, Postman, JIRA, Git/GitHub, VSCode, Webpack, StoryBook

Methods: SDLC, Agile Methodology, OOPs

Server: Tomcat, Apache Server, AWS

Design: Ui/Ux, User Flow, Wireframing, UI Prototyping, Figma, Adobe XD

Technical Experience

Incedo | Gurgaon | July 2023 - Sep 2024

Project 1: Incedo Internal Project | Full Stack Developer

- Constructed and maintained **responsive user interfaces** using **React JS, CSS, HTML, and JavaScript**, enhancing user interaction and satisfaction.
- Architected a **scalable Redux architecture** that supported 20+ components, improving maintainability and allowing for a **50% faster deployment cycle**.
- Integrated **RESTful APIs** with the frontend using **Axios**, improving data communication and reducing load times by **20%**. Ensured security and authentication using **OAuth2.0** and **JWT**.
- Collaborated with **12 team members** to implement **4 innovative features** on schedule, resulting in a **15% increase in user engagement and retention**.
- Designed reusable **UI components**, accelerating development cycles by **30%** and promoting code reusability across multiple projects.
- Applied **agile methodologies**, contributing to over **30 daily stand-ups**, **10+ sprint planning sessions**, and **5 retrospectives**, leading to a **20% improvement** in project workflow efficiency.

Project 2: Incedo Timesheet Project | Frontend Developer

- Developed a **grid table** using **MUI** for employees to log weekly working hours, improving **data accuracy by 30%**.
- Styled the **main page** to improve user experience, resulting in a **20% increase in employee satisfaction**.
- Created a **Save button** to store data and send an **automated email**, reducing entry errors by **25%**.
- Implemented a **confirmation pop-up** to ensure **100% data validation** before finalizing timesheets.

Project 3: Incedo Hackathon | Frontend Developer

- Built a **role management system** for 3 user roles, improving access control and **workflow efficiency by 20%**.
- Designed **10 wireframes**, translating user requirements into **intuitive interfaces**.
- Redesigned the **UI** using **ReactJS** and **Bootstrap**, increasing user engagement by **25%**.

Projects

UI/UX Design | Bê

- Presented **5+ UI/UX projects**, including **user flows, wireframes, and high-fidelity prototypes**.
- Applied **innovative design solutions**, cutting **development time by 25%** and improving **front-end efficiency**.

Development Projects | Q

- Developed a comprehensive webinar application, resulting in a **30% increase in user engagement** and streamlining the scheduling process for webinars.
- Implemented **RESTful APIs**, enhancing data interchange and improving application performance.

Achievements

Improved code efficiency, reducing load times by **20%**.

Learned to write clean and maintainable code, enhancing overall project quality.

Education

NIT Jalandhar | B.Tech | GPA: 7.63 | 2019 – 2023
