## Professional Experience

**Incedo**                                                                                        **July 2023 – Sep 2024**
*Software Developer*                                                                                      *Gurgaon, India*

- Developed responsive UIs with **JavaScript, React.js, Redux**, increasing user engagement by **20%** across **1000+** users and enhancing data communication using **Axios**.
- Maintained reusable JavaScript components, reducing project development time by **25%** and improving code reusability by **30%**; optimized **MUI** grid-based tables, boosting data accuracy by **30%**.
- Collaborated with **5+** backend engineers to implement **OAuth2.0** and **JWT** authentication, reducing errors by **20%** and improving reporting accuracy.
- Enhanced user experience through custom-styled components, improving employee satisfaction by **20%** based on feedback from **100+** employees; Processed **email automation** and **data validation**.
- Accelerated **sprint velocity** by **15%** by implementing **Scrum** ceremonies and fostering **Agile practices** to streamline collaboration across **3 cross-functional teams**.

**B2E Coder**                                                                                        **Jan 2023 – Jun 2023**
*Software Developer (Freelancer)*

- **Personal Finance Management Dashboard**: Developed a mobile-friendly web app, achieving a **20%** increase in user engagement and reducing load times by **15%**.
- Composed secure login, improving authentication speed by **25%**, and added interactive charts, enhancing decision-making accuracy by **30%**.

**Zee Data**                                                                                        **May 2022 – July 2022**
*Software Developer*

- **E-Commerce Web Application**: Executed a responsive **E-commerce platform**, boosting user retention by **25%** and reducing page load times by **20%**.
- Implemented secure authentication and order management, cutting transaction errors by **30%** and improving customer satisfaction by **15%**.

## Projects

**My Portfolio | React.js, Material-UI, Git**                                              *GitHub Link | Live Demo*

- Created a **React application** for a personal portfolio, implementing features such as **form validation**, **search**, and **filtering**. Utilized **React.js**, **Material-UI**, and **Git** for deployment on **Vercel**.

**Webinar Management System | React.js, Material-UI, Git**                                 *GitHub Link | Live Demo*

- Designed an interactive webinar management platform using **React.js** and **Material-UI**; reduced manual data entry time by over **10 hours** weekly while ensuring seamless deployment on **Vercel** with **Git** version control.

**E-Wallet App | React, Redux, Bootstrap**                                                              *GitHub Link*

- Constructed an **E-Wallet app** using **React** and **Redux**, managing transactions and providing real-time alerts.
- Integrated **Bootstrap** for responsive design and delivered it on **GitHub Pages**.

## Technical Skills

**Languages**: JavaScript (ES6+), TypeScript, HTML5, CSS3, C++, SQL, MongoDB, Node.js, AWS, JWT
**Frameworks**: React.js, Redux, Tailwind CSS, Bootstrap, Material-UI, Axios, RESTful API
**Tools**: Git, GitHub, Webpack, Babel, JIRA, VS Code, Storybook, Parcel, Postman
**Development Methods**: Agile, SDLC, OOPs, Debugging

## Certifications

**Databricks Certified Data Engineer Associate** | *Databricks* | 2023

**AWS Certified Cloud Practitioner** | *Amazon Web Services (AWS)* | 2023

**Databricks Accredited Lakehouse Platform Fundamentals** | *Databricks* | 2023

## Education

**NIT Jalandhar**                                                                                 **Aug 2019 – July 2023**
*Bachelor of Technology (B.Tech), GPA: 7.63*                                                         *Jalandhar, India*
